ISIE 2008 – IEEE International Symposium on Industrial Electronics

30 June – 2 July 2008, Cambridge, UK

Special Session on PV POWER INTEGRATION

organized by

Pedro Rodriguez (pro@ieee.org)
Remus Teodorescu (ret@ieee.org)

Call for Papers

Topics of interest include, but are not limited to:

- control of PV power generators and plants
- power quality and stability in grids with high penetration of PV
- anti-islanding detection
- mini-grids and micro-grids based on PV power
- MPPT algorithms
- high efficiency PV power processors
- grid connection codes
- ancillary services
- communication and control of PV clusters
- monitoring, diagnosis and prognosis of PV power systems
- reliability of PV systems
- test and certification of PV systems

Submission procedure: The same as for regular papers.

Submission deadline: 26th November 2007

All the instructions for paper submission are included on the conference website:
