ISIE 2008 – IEEE International Symposium on Industrial Electronics

30 June – 2 July 2008, Cambridge, UK

Special Session on WIND POWER INTEGRATION

organized by

Remus Teodorescu (ret@ieee.org)

Pedro Rodriguez (pro@ieee.org)

Call for Papers

Topics of interest include, but are not limited to:

- control of wind turbines
- control of wind farms
- synchronization of grid converters under fault
- control of grid converters under faults
- grid codes and ride-through
- sensing and communication for wind turbines
- diagnostic for wind turbines
- reliability of wind turbines
- pitch-control
- ancillary services provided by wind turbines
- grid-supporting functions provided by wind turbines

Submission procedure: The same as for regular papers.

Submission deadline: 26th November 2007

All the instructions for paper submission are included on the conference website:
